Description

Cable holder / TR – Flexible and time-saving solution for cable ducts.

Cable holder IBOCO TR is a practical accessory that fits both wide-slot and narrow-slot cable ducts. Easy to use and adapt to different cable duct sizes, making it an indispensable aid in both installation and maintenance.

Features and benefits of IBOCO TR cable holder:

- Flexible length – TR1 and TR1-E are delivered in a size that can be easily cut to match the desired length and needs.
- Fits multiple cable duct types – Ideal for both wide and narrow slotted channels, providing versatility in various projects.
- Efficient and time-saving – A great help for panel builders and installers who want fast, safe and structured cable management.
- Easy to use – Makes it easy to keep cables in place throughout the installation process.

With Cable retainers IBOCO / TR You get a flexible and reliable product that makes work easier both during new installation and service.
