

Emergency Stops

ROBUST AND SAFE

Article:	Emergency Stops
Brand:	Schlegel
IP rating	IP65, IP69K
For hole punching:	Ø 16.2 mm, Ø 22.3 mm, Ø 30.5 mm and 23 x 23 mm, 24 x 24 mm, 26 x 26 mm

Description

Schlegel emergency stop - In dangerous situations, emergency stop switches can protect against serious injury or even save lives. Schlegel's emergency stop impresses customers worldwide. Mechanical robustness, outstanding functionality and safety, as well as attractive design, are good arguments for using our emergency stop switches. Our switches are TÜV certified and available in various shapes, dimensions, and are suitable for our standard and AS-Interface contact blocks.

Emergency stop with illuminated status indication active-inactive

In order to avoid confusing active and inactive emergency-stops, it was necessary for a long time to lock away or cover inactive emergency-stops to make them unrecognizable as soon as the related operating panel or plant part was no longer connected to the overall system.

Since EN ISO 13850:2015 came into force, emergency stops can also indicate their actual operating status through corresponding illumination. To enhance work safety and improve the recognizability of inactive emergency-stop switches, SCHLEGEL has developed emergency stops that signal their active and inactive status using illumination.

Self-monitoring contact block for emergency stop

The self-monitoring emergency-stop contact blocks developed by SCHLEGEL increase safety. The principle of operation: In the event of negligent assembly or mechanical damage (separation of the contact block from the actuator), the self-monitoring emergency-stop contact block ensures the immediate automatic activation of the emergency-off signal. The installation is switched off and can only be restarted after successful troubleshooting.

SAFETY@WORK

Safety@Work allows you to expand existing AS-Interface systems with emergency-stop switches and other safety-related components. Please ask our sales staff about the significant advantages – we will be glad to advise you!
