

## Enclosure | HYDRA

Polyester cabinet / Enclosure | GRP | RAL7035 | IP65/66

Article:	HYDRA
Brand:	
Protection class:	IP66 / IP65
Material:	Polyester
Operating temperature:	-50°C to +85°C
Color:	RAL 7035
Flammability:	V0
Impact resistance:	IK10

### Description

The HYDRA enclosure is a dense glass-fiber reinforced polyester enclosure. HYDRA is particularly suitable for locations with pollution or where there is a risk of flooding (production facilities, sewage treatment plants, coastal areas, etc.). Thanks to the robust construction of the enclosure, it provides you with effective protection for internal units and against external factors (dust, smoke and water).

As the enclosure is cast from glass fiber reinforced polyester, it is also resistant to chemicals and other solvents. Upgrade your installations with a HYDRA cabinet that provides confidence and reliability. Buy yours today!
