

Emergency Stops

ROBUST AND SAFE

Article:	Emergency Stops
Brand:	Schlegel
IP rating:	IP65, IP69K
For hole punching:	Ø 16.2 mm, Ø 22.3 mm, Ø 30.5 mm and 23 x 23 mm, 24 x 24 mm, 26 x 26 mm

Description

Schlegel's emergency stop - In dangerous situations, emergency stop switches can protect against serious injury or even safe life. Schlegel's emergency stop convinces customers all over the world. Mechanical robustness, outstanding functionality and safety as well as the attractive design are good arguments for using our emergency stop switches. Our switches are TÜV certified and available in various shapes, dimensions and suitable for our standard and AS-Interface contact blocks.

Emergency stop with illuminated status indication active-inactive

In order to avoid the mixing up of active and inactive emergency-stops it was necessary for a long time to lock away or cover the inactive emergency-stop to make it unrecognisable as soon as the relating operating panel or plant part was no longer connected to the overall system.

Since the EN ISO 13850:2015 came into force emergency-stops can also indicate the actual operating status by a corresponding illumination. In order to increase the work safety and for a better recognisability of inactive emergency-stop switches, SCHLEGEL has developed emergency-stops which signal the active and inactive status by using their illumination.

Self-monitoring contact block for emergency stop

The self-monitoring emergency-stop contact blocks developed by SCHLEGEL increase the safety. The functional principle: In case of a negligent assembly or a mechanical damage (separation of contact block from the actuator) the self-monitoring emergency-stop contact block ensures the immediate automatic activation of the emergency-off signal. The installation is switched off and can only be restarted after successful trouble-shooting.

SAFETY@WORK

Safety@Work allows you to expand existing AS-Interface systems by emergency-stop switches and other safety-related components. Please ask our sales staff about the significant advantages – we will be glad to advise you!
