Properties	Silicone-free, halogen-free

Description

Brush plate divided / KEL-BES-S Round for round metric drilling M32/M50. We now offer the split brush plate for cable entry KEL-BES-S. It can either be snapped directly into the "hole" or screwed on with a lock nut.

A split brush plate for cable entry "KEL-BES-S" is used to route cables in server racks, controllers, control panels, cabinets and enclosures. KEL-BES-S is also an ideal solution for the entry and exit of cables that are laid inside raised floors, e.g. in data centers.

Note: Snap-in mounting possible if the wall thickness is 1 – 2.5 mm. For wall thicknesses 2.5 mm, a locking nut must be used

Advantages:

- Quick and easy assembly
- Versatile use
- Allows reduced air flow while filtering out dust, hair and larger particles
- Thermal protection, separation of cold and hot air
- Visuell screening
- Protects cables against wear
