The blue signal color provides clear visual identification.

KT-BL multi enables sealing of cables up to IP54.

By using double or quadruple inserts, cable density in cable glands and cable entry frames can be significantly increased. The KT-BL multi series is designed for cable diameters from 1 to 8 mm.

When assembling small inserts in multiple rows, the flat sides should face each other. This ensures that the flat surfaces seal tightly, providing a secure seal.

- High strain relief according to EN 62444
- Available for a wide range of cable diameters
- Blue signal color for clear visual identification within the food industry
- Significantly increased cable density when using twin- or quadruple-hole inserts
