

Accessories Appliance Cabinets | E COR

Accessories for ETA E COR series enclosures for mounting, Installation, and completion

Article:	Accessories Cabinet E COR
Brand:	E.t.a
Pass	Cabinet E COR

Description

Accessories Appliance Cabinets | E COR are developed to complement and optimize enclosure solutions in automation, industry, and electrical installations. The range includes components that improve the functionality, assembly, and customization of control cabinets in demanding environments.

The products are designed for the E COR series and ensure a safe and efficient installation with high compatibility and easy integration. The accessories are used for internal mounting, cable management, door functions, grounding, and mechanical completion, among other things.

COR accessories help designers, system integrators, and machine builders create flexible and reliable solutions with a professional finish and long service life.

Advantages of accessories for ETA E COR

- Customized for ETA E COR appliance cabinets
- Simplifies installation and assembly
- High compatibility and fit
- Suitable for industrial environments
- Contributes to a safe and structured encapsulation solution
