Description

Velcro tie / KLKB | KLB, "hook & loop"-cable ties are more often used to fix cables, because unlike regular cable ties, they can be opened and closed several times.

Hook and loop cable ties are used more and more often to fix cables because, unlike regular cable ties, they can be opened and closed several times. Soft materials leave the cables undamaged, especially in places where the cables vibrate. The hook and loop cable ties are available in four different sizes.

- The cable ties can be purchased individually (KLKB) or as a continuous roll (KLB).
- Reusable
- Spares cable in case of vibration
- Customizable
