

Adapter insert | AT-KS-AK

Keystone socket insert | with protective cover | IP54 / UL Type 12

Article:	AT-KS-AK
Brand:	icotek
Protection class:	IP54
Flammability:	UL94-V0, self-extinguishing
Temperature:	40°C to 100°C
Material:	Elastomer
Material Base frame:	Polyamide
Characteristics:	Silicone-free, Halogen-free
Type:	IMAS-CONNECT™

Description

Adapter grommet / AT-KS-AK IMAS-CONNECT™ is constructed on the basis of a large KT bushing. The polyamide body is molded with elastomer.

The cut-out enables a snap-in assembly of all couplers based on the Keystone system. If required Keystone jack can be disassembled with a screwdriver.

The introduction of the AT-KS-AK into an icotek cable entry frame enables the entry of cables with and without connectors in combination with the creation of interfaces for Keystone couplers within a cable entry system. Separate hole-punching for connectors is no longer necessary.

AT-KS-AK provides protection class IP54 when the door is closed (regardless of Keystone connector type and manufacturer).

AT-KS-AK is compatible with:

Keystone jack

Cable glands for cables with connectors

Cable entry systems for cables with connectors

Advantages:

- Connectors can be integrated directly into the cable entry frame
- Separate cut-outs for connectors are no longer necessary
- Certified protection class IP54 (according to EN 60529) when cover is closed
- The interface can be secured by sealing
- Space-saving design
- Grommet is suitable for all Keystone couplers
