Description

Cable duct / TPD – Installation channel with ready-made knockout holes.

IBOCO TPD KnockOut cable duct is a smart and efficient installation duct equipped with pre-punched knockout holes of 18 and 23 mm. This cable duct is specially developed to simplify the work of fitters and installers - perfect for, among other things, elevator installations, control cabinets and similar electrical installations.

Advantages of IBOCO TPD installation channel:

- Pre-perforated knockout holes – Makes it easy to quickly attach fittings directly to the side walls of the duct.
- Support for protective hose – After installing the screw connection, you can easily connect the protective hose for smooth and protected cable routing.
- Time-saving installation – TPD is designed to make installation work fast, efficient and professional.
- Ideal for elevator installations – A favorite among installers due to its flexibility and ease of use in tight spaces.

With IBOCO KnockOut TPD you get a ready-made cable channel that makes cable routing easier and more structured.
