

Drainage device

For control cabinets & enclosures | M50 | IP66

Article:	Drainage device
Brand:	icotek
IP rating	IP66, IP67, IP69K (EN 60529)
Temperature:	-45°C to 70°C
Mounting options:	Secure with locknut

Description

In cabinets and boxes with a high protection class, temperature differences lead to condensation. By using a drain valve, it is possible to safely remove the condensation without losing the IP66 protection class. A water-permeable membrane ensures the drainage of the casing due to its capillary effect. The design prevents splash water from entering the interior of the housing. The drain valve is attached to the bottom of the cabinet in a hole of Ø 50.5 0.5 mm.

- Make sure that the sealing ring is on the outside and that the hole is free of burrs
