Most RAL colors

Article: Cable ties Colored

Brand: SapiSelco

Description

Cable ties dyed in the material nylon are normally supplied in natural color by the manufacturers, or on request in black with guaranteed self-extinguishing class V2: UL 94. All the data described so far have been taken from the technical documentation of leading manufacturers and normally refer to the product version in natural color.

The raw material can be dyed upon request, depending on the dyes already available, as described in the diagram at the bottom of the page. The dyes used are normally organic. In any event, the technical features described so far must be checked and tested color by color.
