| Characteristics: | Silicone-free, halogen-free |

Description

Brush plate / KEL-BES for routing cables in network cabinets, control units and switch cabinets. The KEL-BES brush plate is an ideal solution for the passage of cables that are laid inside raised floors, e.g. in data centers.

- The KEL-BES brush plate precisely matches cut-out dimensions for the 10/16/24 pin industry standard connector.

Advantages:

- Quick and easy assembly
- Versatile utilization
- Allows reduced airflow while filtering out dust, hair and larger particles
- Visuell screening
- Protects the cables against wear due to sharp edges when drilling holes
