

Adapter insert | AT-HA

Industrial contacts input | 3A / 4A | IP65

Article:	AT-HA
Brand:	icotek
Protection class	IP54, IP55, IP64, IP65
Material:	Elastomer
Material Base frame:	Polyamide
Flammability:	UL94-V0, self-extinguishing
Temperature:	-40°C to 100°C
Characteristics:	silicone-free, halogen-free
Type:	IMAS-CONNECT™

Description

Adapter insert / AT-HA is part of the IMAS-CONNECT™ modular adapter system and for the first time enables direct integration of 3A or 4A inserts into an adapter bushing – without the need for additional cutouts. The AT-HA bushing is based on a large KT cable bushing.

A robust polyamide body is integrated into the bushing. It is fully compatible with all icotek cable entry frames in the KT system and is delivered ready to use with a pre-mounted locking element. In combination with 3A or 4A insert sets and matching contact housings with M20 or M25 cable glands (see table) The AT-HA bushing offers a compact, efficient, and flexible solution for use in industrial applications.

The AT-HA adapter insert is also compatible with several insert manufacturers (Harting, Ilme, Phoenix Contact, TE Connectivity, Weidmüller, Lapp, Amphenol, Molex, RS Pro, ...).

Advantages:

- Space-saving thanks to the integration of the connector into the cable entry frame
- Can be combined with existing KEL frame solutions
- No additional drilling required
- Very easy to assemble
- Compatible with several manufacturers (e.g. Harting Han A)
- High protection class IP65 when connected
