

UPS battery module | CliQ M

Power reserve in compact format for demanding systems | Suitable for 7.2 AH lead-acid battery (without battery)

Article: Battery Module UPS / CliQ M

Brand: Delta Electronics

Output current: Up to 40A

Description

Battery module UPS / CliQ M is a battery module within the CliQ M series, designed for 24V systems and up to 40A output current.

- Fits two 12 V/7.2 Ah lead-acid batteries in series (so a total of 24 V) for backup solutions.
- Features anti-corrosion powder coated chassis, built-in LED battery voltage indicator and temperature monitoring to protect the battery and thus increase its lifespan.
- Designed for industrial applications with DIN rail and hot/fail-safe operation.
- Must be used with CliQ M DC-UPSmodules.
