Description

Hand hydraulic punch tool

The compact and light hand hydraulic punch tool makes it easy to punch holes in V2A stainless steel, mild steel, aluminum or plastic with max. plate thickness of 3 mm (V2A: 2 mm) due to its high hydraulic power. The cylinder of the punch tool rotates 360 ° on 3 axes, so maximum flexibility is found even in hard-to-reach places. The punch tool can be used with all icotek punches and also with punches from other manufacturers.

The delivery includes:

1st hand hydraulic punching machine

1 pull bolt 9.5 mm (3/8" UNF) to 19 mm (3/4" UNF), L: 105 mm

1 pull bolt 19 mm (3/4 "UNF), L: 130 mm
